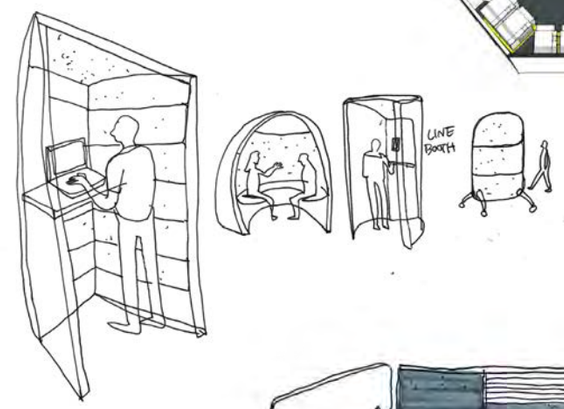
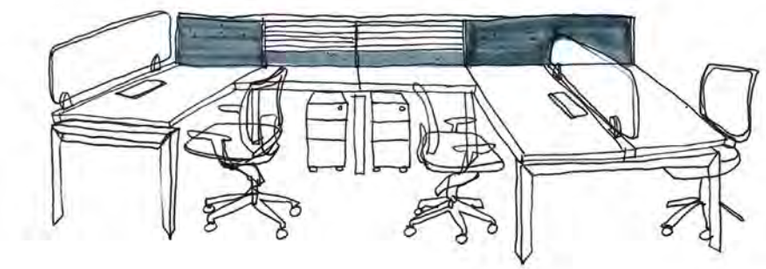
CREATE SPACE POSSIBILITY

Workspace Professional

From Idea to Reality

We aim to create workspace that responds to the variety of activities in a workplace – be it team-based tasks, communication-focused tasks, or tasks that require strong concentration. Our design is therefore not merely fitting furniture to a space. We work closelywith our clients to understand their organisational structure and culture, for we believe that comfortable workspace enhancescreativity and effectiveness at work, and that every space can be maximised.





COMPETE SOLUTION

We focus on uncluttered and livable space that does not compromise on functionality for the residents. Teamwork is a key to ensure the success of each project.

We have capacity for total service from designing, manufacturing standard and custom-made furniture,assembling, and after-sales service. We also have Baan Natura,the unique pre-fabricated timber home range for clients who wish to live closer to nature and are keen to build timber houses or use timber for decorative purposes at home.
