CREATE SPACE POSSIBILITY

Turning
Space into
Opportunities

“Our vision is to help customers maximize space functionality and aesthetics. Appreciation, not sales figures, drives our satisfaction. Working in partnership with our customers, we strive to outfit unique spaces using the best of furniture.”

Create Possibility of Space

The name "Flexiplan Design" reflects the two key pillars of our brand. "Flexiplan" has been both our company's name and brand name for 36 years, and the name was inspired by the goal of setting up a company that offers maximum flexibility for and compatibility with the clients' needs and satisfaction. We do not need to be a big company. We are instead a streamlined organization that is responsive to the pace and demands of big projects. We also conduct our business ethically - we strictly adhere to transactions that are honest and transparent to all stakeholders. The name 'Flexiplan' today still rings true to who we are as it did on the day the company was founded. Flexibility signified by the name also applies to how we strive to continuously evolve and develop to suit the increasingly challenging and diverse projects our clients trust us to undertake.

The second part of our name, "Design", is linked to the vision of the company's founder from day one. Initially our design was limited to good, robust products. Currently, our design capability has expanded to include design and decoration for entire projects, and from focusing on workplace fitting to other types of space including residents, shops and educational premises. The design arm of our business is a key strength that does not only add value to our product manufacturing arm but also sets us apart from our competitors. We are no longer just a manufacturer aiming to produce quality goods; we are also a design service provider who can offer maximum value in the products and services that we have expertise in.

We strongly believe that the design service, in addition to new product development, is critical to responding seamlessly to the clients' needs. Flexibility in product design, choice of material, production method and balance between product manufacturing and appropriate timeframe regardless of ordered quantity is one of key goals. The other main goal is to maintain flexibility in our job scope from the design phase to the production phase, and in working in teams with other companies. In all, these goals add to our ultimate objective of providing better service and ensuring satisfaction of our valued clients.

Accumulated Experience

Experience from Furniture
Production to Space Design Services

1982

The Beginning

Flexiplan Design Co.,Ltd was founded by Mr. Bovornsakdi Krisadaphong, architect and product designer, as a small furniture manufacturing and export company with an authorized capital of one million Baht.

1991

A Pioneer in Manufacturing Technology

Flexiplan had substantially grown into a multimillion dollar company that focused on 'quality for efficiency' in furniture manufacturing. Flexiplan integrated technology and machinery from Homag Group, Germany, in its production line. Flexiplan was considered among the most innovative and progressive furniture manufacturers at the time.

2000

From Mass Production to Customization

With full production capacity coupled with expertise in project management from the Managing Director, Mr. Senat Chaiyakul, Flexiplan was able to manufacture for many large-scale projects. The increased level of involvement in large and complex projects led to the move toward a more flexible way of manufacturing. Flexiplan started to focus on tailoring for each project with customized rather than mass-produced goods.

2005

Expanding the Product Range

Flexiplan partnered with furniture import companies that focused on high-end European furniture as well as invested in new product development. Flexiplan also expanded the business to manufacturing prefabricated timber homes, 'Baan Natura'.

2010

AEC Partnership

Flexiplan has extended its international partnership and business connection to the Asia-Pacific region and China with the aim to exchange and co-develop products, and cater for the growth in the AEC and global market. Flexiplan's main partners are TaZ corporation, Sdn Bhd (System Furniture manufacturer and exporter based in Malaysia), and other furniture manufacturers in the region.

2014

New Showroom

Flexiplan open new showroom to show customers more easily accessible. Can see the actual product preview. There are standard test areas for customers are interested in study the product.

Present

Going Forward into Space Design and Utilisation

The continuous growth from a small workshop to a modern factory with cutting-edge technology to a project-based furniture manufacturer to an active member of an international network has built Flexiplan from a merchandise production company into an end-to-end product and service provider of quality furniture and space design.

We believe that our clients are our long-term partners. We also strongly believe in approaching a project as if it was our own, in having a shared goal, and in working closely with our clients to achieve a shared goal. With this vision in mind, we strive to address challenges that are present in nearly every project and succeed as a team.

Service

Space Planning & Interior Design

We design space to achieve maximum usage. Our experienced team uses 3D presentation to assist with design visualisation, and provide high level of details for beautiful interior design. The objective is stunning space that is achievable and within required budget and timeframe.

Furniture Design & Sourcing

We design furniture tailored to our clients' needs. We also source locally and internationally for furniture each project needs.

Budget Estimation & Project Planning

We professionally provide costing for a project right from project inception to prevent additional requests for more investment. During this process, we supply a practical project plan in order for our clients to have all the information needed to sign-off their projects.

Interior Creation

Being flexible, we are ready to organise subcontractors for end-to-end interior creation. We work closely with our clients and our internal teams to ensure smooth management of any projects.

Furniture Manufacturing

We manufacture our standard furniture, made-to-order furniture, and furniture our clients design. We aim to achieve exceptional standards, on-time delivery, and flexibility in the manufacturing process that include flexible quantity of products made and materials used to make sure the client's expectations are met.

Installation & Built-In

We have an experienced team for on-site assembly and built-in jobs. For bigger projects, we provide a foreman to oversee the project and coordinate with the clients and Flexiplan's internal teams.

Every spaces

Companies these days are looking toward workplaces that provide creative freedom and optimized results. The design of the workspace impacts performance, employee engagement and innovation.

Vibe

Vibe creates simplified solutions, productivity, versatility and practicality while maintaining unique defined lines and curved geometries designed to suit today's modern office space. With its all-steel components consist of leg structure and beam support.

X_cept

X_cept is a square shape metal legs and frame that supports a wide range of worksurface and finishes that could come with simplified cable management

Products
