

StanTM

“AN IDEA IS SALVATION BY IMAGINATION”

FRANK LLOYD WRIGHT

In the day and age we live in, to provide a genuinely new design stimulus for the merging of everyday living and work in their countless variations requires a particular sensitivity to the balance between simplicity and presence, as well as an intelligent interpretation of the relationship between line, area and space.

Stan provides the opportunity to create an atmosphere that goes beyond appearances that achieves this all in one distinctive architectural design language that communicates future oriented awareness.

Clean aesthetics, seamless design.

A table is perhaps the most important element of furniture for influencing togetherness within a company. In a meeting at the workplace, in a conference or in an executive's office – this is where people meet to assure themselves of their common identity and to develop new ideas. For companies that assign as much value to openness, lightness and dynamics as to high-level quality and enduring elegance. The Stan desking range offers a table culture of the highest degree of excellence and architectural design quality.

Managerial – make it happen.

Elegant forms integrated with high-tech function. Stan conference tables outfit meeting spaces with power, style and authority. Flip up doors reveal instant access to connections. Hidden channels under the surface handle the most demanding communication systems while keeping Stan's clean lines intact.

Conferencing – Decision-maker.

Stan – table culture.

Evolving the personal workstation means better meeting the needs of the individual. Within their own space people want privacy, control, and the ability to easily interact with others when they choose. Stan desking solutions help create this balance with a clean and light architectural design statement.

stan – creative work environments.

Stan provides the power to create and recreate on the spot. Stan meeting and training tables are designed to give businesses the ability to quickly and easily reconfigure a room to meet demands from any user group the world over.

Training – Learn, adapt, evolve.

Pop up power / data Module

Leg angle adjustment
